## Data Sheet

# CD9 Fab-Strep human

Cat. No.: 6-8019-150

Version: 1.1  
Revision Date: 09.09.2021

<b>Description</b>	Recombinant low affinity Fab fragment fused to a Twin-Strep-tag® and specific for human CD9.
<b>Purity</b>	≥ 90%
<b>Endotoxin level</b>	≤ 0,1 EU/µg by LAL test
<b>Form</b>	Lyophilized
<b>Amount</b>	50 µg
<b>Reconstitution</b>	Reconstitute in 1 ml buffer, e.g. 1x PBS containing 1 mM EDTA and 0.5% BSA, for a final concentration of 50 µg/ml. Handle under sterile conditions.
<b>Stability</b>	6 months after shipping
<b>Storage</b>	Lyophilized: 2-8 °C; reconstituted: -80 °C. Avoid multiple freeze-thaw cycles.
<b>Shipping</b>	Room temperature or blue ice
<b>Hazards</b>	Product is not classified as hazardous according to (EC) No 1272/2008 [CLP]. A Material Safety Data Sheet is provided.
<b>Application</b>	Fab-Streps were developed for Traceless Affinity Cell Selection (Fab-TACS®), based on our Strep-tag® technology. They are also suitable for exosome isolation. An increase in avidity is required for stable binding to the target. Combining Fab-Streps with a Strep-Tactin® backbone generates complexes that stably bind to exosomes. For <b>traceless affinity isolation of exosomes</b> (Fab-TACS® for exosomes), Fab-Streps are combined with Strep-Tactin® TACS Agarose columns. Biotin causes the dissociation of all reagents from the exosomes, yielding label-free populations for unbiased further use.
