Data Sheet

MEXi-293E cells

Cat. No.: 2-6001-001

Version: 3.0
Revision Date: 02.06.2021

| | |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Description | MEXi-293E cells are human embryonic kidney (HEK) cells derived from the 293 cell line and used for propagation of plasmids and expression of recombinant proteins in mammalian cells. The cell line expresses the EBNA-1 protein for episomal replication of <i>oriP</i>-harboring plasmids. The cell line is adapted for growth in suspension and for use with the MEXi-Mammalian Expression System. |
| Cell type | Kidney (embryonic) |
| Growth properties | Suspension cells |
| Biosafety level | S1 (Germany), BSL-2 (USA) (Please check which level is applicable for your country). |
| Media adaptation | MEXi-CM and MEXi-TM medium |
| Form | cryopreserved |
| Amount | 1.5 ml |
| Stability | 6 months after shipping |
| Storage | store in cryo storage system at – 196 °C to -140 °C |
| Shipping | Dry ice |
| Hazards | Product is not classified as hazardous according to (EC) No 1272/2008 [CLP]. A Material Safety Data Sheet is provided. |
