

Order form for MHC Streptamer® Custom Service

Last date of revision: January 2024
Version DC07-0015

Please fill out the following and send to **strep-tag@iba-lifesciences.com**

Streptamer® Custom Service order	Please indicate
Production of a <i>Streptamer</i> MHC class I of the following species	<input type="checkbox"/> human <input type="checkbox"/> mouse
MHC class I heavy chain allele? (e.g. HLA-A*0201 or H-2 K ^b)	_____
Designation of antigen? (e.g. CMV PP65)	_____
Antigen peptide sequence? (8-11 amino acids in one-letter-code)	_____
Has this combination of MHC class I and peptide been successfully produced already?	<input type="checkbox"/> no, not to my knowledge <input type="checkbox"/> yes, in our lab <input type="checkbox"/> yes, it is offered elsewhere <input type="checkbox"/> yes, please refer to this publication _____
Order of Custom Service	<input type="checkbox"/> without peptide synthesis (Cat. No. 6-9010-001): US\$ 5.432 I will supply the peptide (50 mg, HPLC purified, >80% purity, lyophilized, certificate of analysis will be provided, please refer to shipment instructions below) <input type="checkbox"/> with peptide synthesis (Cat. No. 6-9010-002): US\$ 5.832 IBA shall synthesize the peptide
Custom Service includes:	50 tests* custom made MHC I-Strep as well as one of the following reagents (please choose one): <input type="checkbox"/> Strep-Tactin PE, 50 tests* for cell staining or <input type="checkbox"/> Strep-Tactin APC, 50 tests* for cell staining or <input type="checkbox"/> Streptamer Magnetic Beads, 5 preps human or 2.5 preps murine* for cell isolation <small>* "Tests" refers to staining with fluorescently labeled <i>Strep-Tactin</i>® (1 test is sufficient to stain 1-2 x10⁶ T-cells) while "preps" refers to T-cell purification with <i>Streptamer</i>® Magnetic Beads (1 prep is sufficient to purify T-cells out of a total of 2x10⁷ cells).</small>
