Data Sheet

pLSG-IBA23

Cat. No.: 5-4823-001

Version: 3.0 Revision Date: 27.07.2021

Description	StarGate Acceptor Vector for high-level expression of target proteins in insect cells. The gene transfer into the polyhedrin gene locus of AcMNPV DNA is achieved by homologous recombination and the vector carries a polyhedrin promoter. Co-transfection with BacPAK6 linearized AcMNPV DNA (Clontech) or with circular flashBAC modified AcMNPV DNA (Oxford Expression Technologies) allows the generation of recombinant baculovirus at very high efficiency through reconstitution of an essential gene (ORF 1629) and elimination of wild-type virus to great extent. The expressed recombinant protein will be localized in the cytoplasm.
Affinity tag	Strep-tag®II is fused to the C-terminus and GST-tag is fused to the N-terminus of the recombinant protein. GST-tag can be removed by digesting with PreScission™ Protease.
Cloning Strategy	Cloning into StarGate Acceptor Vectors has to be done with the restriction enzyme Esp3I. There is no Multiple Cloning Site (MCS) available that can be used for the integration of the gene of interest instead (see manual).
Resistance	Ampicillin: for selection of transformed <i>E. coli</i> cells
Form	5 μg, dissolved in 20 μl TE buffer, pH 8.0: 10 mM Tris/HCl, 1 mM EDTA
Concentration	250 ng/μl
Stability	12 months after shipping
Storage	recommended: 2-8 °C for frequent usage, -20 °C for long-term storage
Shipping	room temperature
Hazards	Product is not classified as hazardous according to (EC) No 1272/2008 [CLP]. A Material Safety Data Sheet is provided.

For research use only

Trademark information

The owners of trademarks marked by "[®]" or "TM" are identified at <u>http://www.iba-lifesciences.com/patents.html</u>. Registered names, trademarks, etc. used in this document, even when not specifically marked as such, are not to be considered unprotected by law.

Important licensing information

This product is covered by intellectual property (IP) rights and on completion of the sale IBA Lifesciences grants respective Limited Use Label Licenses to purchaser. IP rights and Limited Use Label Licenses for said technology are further described and identified at http://www.iba-lifesciences.com/patents.html or upon inquiry at info@iba-lifesciences.com/patents.html or upon inquiry at info@iba-lifesciences.com or at IBA Lifesciences GmbH, Rudolf-Wissell-Str. 28, 37079 Goettingen, Germany. By use of this product the purchaser accepts the terms and conditions of all applicable Limited Use Label Licenses.

Expression cassette of pLSG-IBA23; continued

Features	from bp	to bp	Sequencing primer
AcMNPVseq II	1	1395	LSG-Primer-for
M13 ori	1447	1920	
Ampicillin resistance gene	2251	3111	5'- TAACCATCTCGCAAATAAATAAG -3'
ColEl ori	3259	3902	
AcMNPVseq I	4211	5357	LSG-Primer-rev
Polyhedrin promoter	5286	5355	LSG-FIIIIei-Iev
forward primer binding site	5286	5308	5'- CAACGCACAGAATCTAGCGC -3'
GST-tag	5369	6022	
PreScission [™] Protease site (PCS)	6023	6070	
LacZ alpha fragment	5299	6700	
Strep-tag [®] II	6764	6796	
reverse primer binding site	6862	6881	
total vector length		6881
